

Artisan Academy — Chapter 2 Workbook

Haircut Development, Product Knowledge & Clientele Building

This workbook accompanies Chapter 2 of Artisan Academy. Use the website lessons for instruction, then use these pages to plan the work, document supervised services, reflect on feedback, track client-building activity, and prepare for the final capstone.

How to use this workbook

Bring this workbook into the work itself. Fill out the planning sections before a service when the lesson asks you to. Complete the service notes while the details are still fresh. Use the scorecard and instructor feedback to decide what needs another repetition.

The goal is not to complete pages for the sake of completing pages. The goal is to create a record of how your judgment, technique, timing, product knowledge, and client book are developing across the chapter.

Chapter 2 targets

- By the end of Chapter 2, you are working toward:
- 30 documented supervised services across the chapter.
- Consistent execution across the foundational haircut families.
- Professional consultations that turn the client's goal into a clear haircut plan.
- Product recommendations based on hold, finish, length, density, texture, and routine.
- A clear at-home styling explanation for the client.
- A portfolio of at least 15 approved looks with permission.
- A starter clientele of at least 12 returning or rebooking clients.
- Progress toward a 45-minute haircut target where appropriate without sacrificing quality.

Lesson 2.1 — The Artisan Standard & Client Consultation

A. Consultation observation

Shadow three consultations led by Charlie or another senior barber. For each one, record what the barber noticed, what they asked, what changed after the client answered, and how the final plan was explained.

OBSERVATION 1

Client goal:

What the barber noticed before cutting:

Important questions asked:

Hair/head factors that changed the plan:

How the plan was explained back to the client:

One thing I would carry into my own consultation:

OBSERVATION 2

Client goal:

What the barber noticed before cutting:

Important questions asked:

Hair/head factors that changed the plan:

How the plan was explained back to the client:

One thing I would carry into my own consultation:

OBSERVATION 3

Client goal:

What the barber noticed before cutting:

Important questions asked:

Hair/head factors that changed the plan:

How the plan was explained back to the client:

One thing I would carry into my own consultation:

B. My supervised consultations

CONSULTATION 1

Client/model:

Desired result:

Head shape / growth pattern / crown notes:

Density / texture / length / condition:

Face shape / desired silhouette:

My proposed haircut plan:

What I confirmed with the client before beginning:

Instructor note:

CONSULTATION 2

Client/model:

Desired result:

Head shape / growth pattern / crown notes:

Density / texture / length / condition:

Face shape / desired silhouette:

My proposed haircut plan:

What I confirmed with the client before beginning:

Instructor note:

CONSULTATION 3

Client/model:

Desired result:

Head shape / growth pattern / crown notes:

Density / texture / length / condition:

Face shape / desired silhouette:

My proposed haircut plan:

What I confirmed with the client before beginning:

Instructor note:

C. Five core product flash cards

PRODUCT 1

Product name:

Hold:

Finish:

Damp or dry application:

Best haircut/style pairings:

Client-friendly explanation:

PRODUCT 2

Product name:

Hold:

Finish:

Damp or dry application:

Best haircut/style pairings:

Client-friendly explanation:

PRODUCT 3

Product name:

Hold:

Finish:

Damp or dry application:

Best haircut/style pairings:

Client-friendly explanation:

PRODUCT 4

Product name:

Hold:

Finish:

Damp or dry application:

Best haircut/style pairings:

Client-friendly explanation:

PRODUCT 5

Product name:

Hold:

Finish:

Damp or dry application:

Best haircut/style pairings:

Client-friendly explanation:

D. Build the prospect list

Create a list of 25 people you can approach professionally for supervised model services.

1. Name / relationship / best contact method:

2. Name / relationship / best contact method:

3. Name / relationship / best contact method:

4. Name / relationship / best contact method:

5. Name / relationship / best contact method:

6. Name / relationship / best contact method:

7. Name / relationship / best contact method:

8. Name / relationship / best contact method:

9. Name / relationship / best contact method:

10. Name / relationship / best contact method:

11. Name / relationship / best contact method:

12. Name / relationship / best contact method:

13. Name / relationship / best contact method:

14. Name / relationship / best contact method:

15. Name / relationship / best contact method:

16. Name / relationship / best contact method:

17. Name / relationship / best contact method:

18. Name / relationship / best contact method:

19. Name / relationship / best contact method:

20. Name / relationship / best contact method:

21. Name / relationship / best contact method:

22. Name / relationship / best contact method:

23. Name / relationship / best contact method:

24. Name / relationship / best contact method:

25. Name / relationship / best contact method:

E. Outreach and bookings

1. Person contacted / date sent / response / next step:

2. Person contacted / date sent / response / next step:

3. Person contacted / date sent / response / next step:

4. Person contacted / date sent / response / next step:

5. Person contacted / date sent / response / next step:

6. Person contacted / date sent / response / next step:

7. Person contacted / date sent / response / next step:

8. Person contacted / date sent / response / next step:

9. Person contacted / date sent / response / next step:

10. Person contacted / date sent / response / next step:

Three confirmed supervised model appointments:

1. Model / service / appointment:

2. Model / service / appointment:

3. Model / service / appointment:

Lesson 2.1 reflection

What am I already noticing faster during consultations?

Where do I still need instructor help turning the consultation into a technical plan?

Lesson 2.2 — Buzz Cut & Classic Clipper Foundation

A. Pre-service clipper plan

Complete this before each of the three supervised models.

MODEL 1

Service:

Growth direction / crown map:

Guard choice and why:

Natural or sharpened hairline? Why?

Areas likely to read darker:

Product decision: none or 30 Proof Styling Cream? Why?

Expected maintenance recommendation:

Recorded service time:

Rebooking offered? Result:

Instructor feedback / next repetition:

MODEL 2

Service:

Growth direction / crown map:

Guard choice and why:

Natural or sharpened hairline? Why?

Areas likely to read darker:

Product decision: none or 30 Proof Styling Cream? Why?

Expected maintenance recommendation:

Recorded service time:

Rebooking offered? Result:

Instructor feedback / next repetition:

MODEL 3

Service:

Growth direction / crown map:

Guard choice and why:

Natural or sharpened hairline? Why?

Areas likely to read darker:

Product decision: none or 30 Proof Styling Cream? Why?

Expected maintenance recommendation:

Recorded service time:

Rebooking offered? Result:

Instructor feedback / next repetition:

B. Clipper self-check

Where did I lose time?

Did I overwork any area? If yes, why?

What changed when I cross-checked from another direction?

What did I learn about crown control or the hairline?

Lesson 2.3 — Classic Taper & Low Taper Family

A. Explain the taper family

In your own words, explain each term as if you were speaking to a client.

Classic taper:

Taper fade:

Skin taper:

What is the clearest difference between them?

B. Supervised taper services

TAPER MODEL 1

Hair density / texture / growth pattern:

Taper selected:

First-guideline decision:

Weight I intentionally preserved:

Where clipper-over-comb was used:

Temple / nape symmetry notes:

Product selected: Clay Pomade or All-Purpose Pomade? Why?

Instructor feedback:

TAPER MODEL 2

Hair density / texture / growth pattern:

Taper selected:

First-guideline decision:

Weight I intentionally preserved:

Where clipper-over-comb was used:

Temple / nape symmetry notes:

Product selected: Clay Pomade or All-Purpose Pomade? Why?

Instructor feedback:

TAPER MODEL 3

Hair density / texture / growth pattern:

Taper selected:

First-guideline decision:

Weight I intentionally preserved:

Where clipper-over-comb was used:

Temple / nape symmetry notes:

Product selected: Clay Pomade or All-Purpose Pomade? Why?

Instructor feedback:

C. Product comparison

Clay Pomade: when would I choose it?

All-Purpose Pomade: when would I choose it?

How would I explain the difference to a client in one sentence?

Lesson 2.4 — The Skin-Fade Family

A. Fade design before the first guideline

SKIN-FADE MODEL 1

Requested fade:

Head-shape notes:

Chosen fade height and why:

Parietal-ridge weight I need to protect:

Areas where dents / protrusions / density may affect the blend:

Product choice and why:

Target time:

Actual service time:

Where I lost the most time:

What strong-light inspection revealed:

SKIN-FADE MODEL 2

Requested fade:

Head-shape notes:

Chosen fade height and why:

Parietal-ridge weight I need to protect:

Areas where dents / protrusions / density may affect the blend:

Product choice and why:

Target time:

Actual service time:

Where I lost the most time:

What strong-light inspection revealed:

SKIN-FADE MODEL 3

Requested fade:

Head-shape notes:

Chosen fade height and why:

Parietal-ridge weight I need to protect:

Areas where dents / protrusions / density may affect the blend:

Product choice and why:

Target time:

Actual service time:

Where I lost the most time:

What strong-light inspection revealed:

B. 24-hour follow-up tracker

1. Client / follow-up sent / response / rebook status:

2. Client / follow-up sent / response / rebook status:

3. Client / follow-up sent / response / rebook status:

C. Fade reflection

Did I ever push a fade higher to chase a dark area? What should I do differently?

What is the clearest sign that I preserved the intended silhouette?

Lesson 2.5 — Clipper-and-Scissor Classic

A. Shape plan

SERVICE 1

Client's normal styling routine:

Intended silhouette:

Top-length goal:

Connected or intentionally disconnected? Why?

Sectioning / guide plan approved by instructor:

Where weight should remain:

Blow-dry direction:

Product choice: All-Purpose Pomade or Hair Pomade? Why?

Service time:

Instructor feedback:

SERVICE 2

Client's normal styling routine:

Intended silhouette:

Top-length goal:

Connected or intentionally disconnected? Why?

Sectioning / guide plan approved by instructor:

Where weight should remain:

Blow-dry direction:

Product choice: All-Purpose Pomade or Hair Pomade? Why?

Service time:

Instructor feedback:

SERVICE 3

Client's normal styling routine:

Intended silhouette:

Top-length goal:

Connected or intentionally disconnected? Why?

Sectioning / guide plan approved by instructor:

Where weight should remain:

Blow-dry direction:

Product choice: All-Purpose Pomade or Hair Pomade? Why?

Service time:

Instructor feedback:

B. 60-second home-styling lesson

Write the version you would actually say to a client.

How much product?

Where does it go first?

What should the client do with their hands / comb / dryer?

What result should they expect?

C. Home-care recommendation cards

1. Client / product / amount / application / maintenance recommendation:

2. Client / product / amount / application / maintenance recommendation:

3. Client / product / amount / application / maintenance recommendation:

Lesson 2.6 — Texture, Volume & Modern Styling

A. Texture plan

TEXTURE MODEL 1

Haircut / desired result:

What density must be protected?

What bulk actually needs to be removed?

Technique used and why:

Fringe / curl / movement notes:

Blow-dry direction and volume goal:

Product sequence:

Service time:

Instructor feedback:

TEXTURE MODEL 2

Haircut / desired result:

What density must be protected?

What bulk actually needs to be removed?

Technique used and why:

Fringe / curl / movement notes:

Blow-dry direction and volume goal:

Product sequence:

Service time:

Instructor feedback:

TEXTURE MODEL 3

Haircut / desired result:

What density must be protected?

What bulk actually needs to be removed?

Technique used and why:

Fringe / curl / movement notes:

Blow-dry direction and volume goal:

Product sequence:

Service time:

Instructor feedback:

B. Product sequencing

40 Proof Sea Salt Spray: when would it enter the process?

Texturizing Paste: what finish/problem does it solve?

Advanced Volumizing Foam: when is fullness the priority?

Describe one service where you would layer two products and why:

C. Portfolio post planner

PORTFOLIO POST 1

Client photo permission confirmed:

Correct haircut name:

Client goal in one sentence:

Product used:

Booking instruction:

Instructor approval:

PORTFOLIO POST 2

Client photo permission confirmed:

Correct haircut name:

Client goal in one sentence:

Product used:

Booking instruction:

Instructor approval:

PORTFOLIO POST 3

Client photo permission confirmed:

Correct haircut name:

Client goal in one sentence:

Product used:

Booking instruction:

Instructor approval:

Lesson 2.7 — Scissor-Only Haircutting

A. Scissor-only shape plan

SCISSOR MODEL 1

Length category: short / medium / long

Desired silhouette:

Sectioning plan:

Stationary or traveling guide? Why?

Elevation / overdirection decision:

Graduation / layering decision:

Cowlick / recession / movement notes:

Dry-detailing notes:

Product / conditioner recommendation:

Maintenance interval and why:

Instructor feedback:

SCISSOR MODEL 2

Length category: short / medium / long

Desired silhouette:

Sectioning plan:

Stationary or traveling guide? Why?

Elevation / overdirection decision:

Graduation / layering decision:

Cowlick / recession / movement notes:

Dry-detailing notes:

Product / conditioner recommendation:

Maintenance interval and why:

Instructor feedback:

SCISSOR MODEL 3

Length category: short / medium / long

Desired silhouette:

Sectioning plan:

Stationary or traveling guide? Why?

Elevation / overdirection decision:

Graduation / layering decision:

Cowlick / recession / movement notes:

Dry-detailing notes:

Product / conditioner recommendation:

Maintenance interval and why:

Instructor feedback:

B. Maintenance recommendation practice

Short scissor cut:

Medium-length scissor cut:

Long scissor cut:

What changes the recommendation besides length?

Lesson 2.8 — Beard Design & Hair-and-Beard Coordination

A. Beard consultation and design

BEARD SERVICE 1

Desired beard length:

Density / patchiness notes:

Face-shape consideration:

Check-line decision:

Neck-line decision:

Sideburn connection to haircut:

Where I showed the client the shape before removing more:

Product recommendation:

Instructor feedback:

BEARD SERVICE 2

Desired beard length:

Density / patchiness notes:

Face-shape consideration:

Cheek-line decision:

Neck-line decision:

Sideburn connection to haircut:

Where I showed the client the shape before removing more:

Product recommendation:

Instructor feedback:

BEARD SERVICE 3

Desired beard length:

Density / patchiness notes:

Face-shape consideration:

Cheek-line decision:

Neck-line decision:

Sideburn connection to haircut:

Where I showed the client the shape before removing more:

Product recommendation:

Instructor feedback:

B. Hair-and-beard combination

How did the haircut and beard need to coordinate?

What transition made the biggest difference?

How did I present the combination service without creating pressure?

C. Product-language check

Write a client-friendly explanation of Beard Balm that stays cosmetic:

Write a client-friendly explanation of Styling Cream for light beard control:

List two claims I should not make about grooming products:

Lesson 2.9 — Children’s Services & Advanced Elective Work

A. Children’s service preparation

CHILDREN’S SERVICE 1

Supervising professional:

Child’s comfort / communication needs:

Parent’s requested result:

How I explained tools before using them:

Where movement changed my technical plan:

Product approved by parent? If yes, what and why?

Did comfort ever take priority over speed? What happened?

Instructor approval / feedback:

CHILDREN'S SERVICE 2

Supervising professional:

Child's comfort / communication needs:

Parent's requested result:

How I explained tools before using them:

Where movement changed my technical plan:

Product approved by parent? If yes, what and why?

Did comfort ever take priority over speed? What happened?

Instructor approval / feedback:

B. Advanced elective approval

Elective service selected:

Why I am ready to attempt this after the foundational cuts:

Instructor approval before service:

What foundational skills this service still depends on:

Service result / instructor feedback:

C. Family-client follow-up

Write a low-pressure way to invite a satisfied parent to rebook the child or consider an adult appointment:

Lesson 2.10 — Capstone, Product Examination & Client Book

A. Capstone service 1

Service: clipper-and-scissor or scissor-only

Client goal:

Technical plan:

Key risks / areas requiring attention:

Finishing product and why:

Home-care explanation:

Photo permission:

Rebooking recommendation:

Final score:

Instructor debrief:

What I would change on the next version of this service:

B. Capstone service 2

Service: taper / skin fade / beard combination / textured haircut

Client goal:

Technical plan:

Key risks / areas requiring attention:

Finishing product and why:

Home-care explanation:

Photo permission:

Rebooking recommendation:

Final score:

Instructor debrief:

What I would change on the next version of this service:

C. Product examination

For each instructor-provided scenario, identify the client need and explain the product recommendation.

SCENARIO 1

Desired hold:

Desired finish:

Damp or dry application:

Proper amount:

Best product:

How I would explain home use:

SCENARIO 2

Desired hold:

Desired finish:

Damp or dry application:

Proper amount:

Best product:

How I would explain home use:

SCENARIO 3

Desired hold:

Desired finish:

Damp or dry application:

Proper amount:

Best product:

How I would explain home use:

SCENARIO 4

Desired hold:

Desired finish:

Damp or dry application:

Proper amount:

Best product:

How I would explain home use:

SCENARIO 5

Desired hold:

Desired finish:

Damp or dry application:

Proper amount:

Best product:

How I would explain home use:

D. 30-day booking plan

Current models most likely to return:

1. Name / last service / next maintenance window / follow-up date:

2. Name / last service / next maintenance window / follow-up date:

3. Name / last service / next maintenance window / follow-up date:

4. Name / last service / next maintenance window / follow-up date:

5. Name / last service / next maintenance window / follow-up date:

6. Name / last service / next maintenance window / follow-up date:

7. Name / last service / next maintenance window / follow-up date:

8. Name / last service / next maintenance window / follow-up date:

9. Name / last service / next maintenance window / follow-up date:

10. Name / last service / next maintenance window / follow-up date:

11. Name / last service / next maintenance window / follow-up date:

12. Name / last service / next maintenance window / follow-up date:

Referral prospects:

1. Name / connection / outreach date:

2. Name / connection / outreach date:

3. Name / connection / outreach date:

4. Name / connection / outreach date:

5. Name / connection / outreach date:

Weekly portfolio plan:

Week 1 — three posts:

Week 2 — three posts:

Week 3 — three posts:

Week 4 — three posts:

Five personal outreach messages per week — how will I make this repeatable?

My available appointment windows:

My weekly follow-up day:

E. Graduation checklist

- Two passing capstone services.
- Product examination score of at least 80%.
- Portfolio of 15 approved looks.
- 30 documented supervised services.
- At least 12 returning or rebooking clients.
- Final instructor review completed.

Shared Tool — Apprentice Scorecard

Use this after supervised services and for the final capstones.

- Consultation and understanding of the client's goal — 15 points.
- Sectioning, tool control, and safe technique — 15 points.
- Shape, proportion, and silhouette — 20 points.
- Blend, detailing, hairline, and finish — 20 points.
- Product selection and application — 10 points.
- Professionalism, cleanliness, and client comfort — 10 points.
- Timing, home-care explanation, and rebooking — 10 points.

Total — 100 points.

Passing score — 80%.

A serious sanitation, client-safety, or professional-conduct problem causes the service to fail regardless of the numerical score.

Service / date:

Score:

Instructor notes:

Strongest category:

Priority for the next repetition:

Shared Tool — Client & Service Tracker

Update this after every service. Use the entries to see which haircut families need more repetition, where service time is being lost, which products are becoming familiar, which clients may be ready to return, and which looks belong in the portfolio.

For each service record:

- Date
- Client
- Haircut / service
- Product used
- Service time
- Photo permission
- Rebooked
- Follow-up sent
- Instructor notes

1. Date / client / service / product / time / photo / rebook / follow-up / notes:

2. Date / client / service / product / time / photo / rebook / follow-up / notes:

3. Date / client / service / product / time / photo / rebook / follow-up / notes:

4. Date / client / service / product / time / photo / rebook / follow-up / notes:

5. Date / client / service / product / time / photo / rebook / follow-up / notes:

6. Date / client / service / product / time / photo / rebook / follow-up / notes:

7. Date / client / service / product / time / photo / rebook / follow-up / notes:

8. Date / client / service / product / time / photo / rebook / follow-up / notes:

9. Date / client / service / product / time / photo / rebook / follow-up / notes:

10. Date / client / service / product / time / photo / rebook / follow-up / notes:

11. Date / client / service / product / time / photo / rebook / follow-up / notes:

12. Date / client / service / product / time / photo / rebook / follow-up / notes:

13. Date / client / service / product / time / photo / rebook / follow-up / notes:

14. Date / client / service / product / time / photo / rebook / follow-up / notes:

15. Date / client / service / product / time / photo / rebook / follow-up / notes:

16. Date / client / service / product / time / photo / rebook / follow-up / notes:

17. Date / client / service / product / time / photo / rebook / follow-up / notes:

18. Date / client / service / product / time / photo / rebook / follow-up / notes:

19. Date / client / service / product / time / photo / rebook / follow-up / notes:

20. Date / client / service / product / time / photo / rebook / follow-up / notes:

21. Date / client / service / product / time / photo / rebook / follow-up / notes:

22. Date / client / service / product / time / photo / rebook / follow-up / notes:

23. Date / client / service / product / time / photo / rebook / follow-up / notes:

24. Date / client / service / product / time / photo / rebook / follow-up / notes:

25. Date / client / service / product / time / photo / rebook / follow-up / notes:

26. Date / client / service / product / time / photo / rebook / follow-up / notes:

27. Date / client / service / product / time / photo / rebook / follow-up / notes:

28. Date / client / service / product / time / photo / rebook / follow-up / notes:

29. Date / client / service / product / time / photo / rebook / follow-up / notes:

30. Date / client / service / product / time / photo / rebook / follow-up / notes:

Shared Tool — Portfolio Tracker

Track only looks that are approved for the professional portfolio and have clear photo permission.

1. Client / haircut / product / photo permission / instructor approval / post status:

2. Client / haircut / product / photo permission / instructor approval / post status:

3. Client / haircut / product / photo permission / instructor approval / post status:

4. Client / haircut / product / photo permission / instructor approval / post status:

5. Client / haircut / product / photo permission / instructor approval / post status:

6. Client / haircut / product / photo permission / instructor approval / post status:

7. Client / haircut / product / photo permission / instructor approval / post status:

8. Client / haircut / product / photo permission / instructor approval / post status:

9. Client / haircut / product / photo permission / instructor approval / post status:

13. Client / haircut / product / photo permission / instructor approval / post status:

14. Client / haircut / product / photo permission / instructor approval / post status:

15. Client / haircut / product / photo permission / instructor approval / post status:

Reference — Core Product Guide

All-Purpose Pomade

What to know: Strong, long-lasting hold; low-shine finish; water-based; about a dime-sized amount on damp or dry hair.

Best pairings: Side parts, slick backs, classic clipper-and-scissor cuts, polished pompadours.

Client-friendly explanation: Strong control without excessive shine.

Texturizing Paste

What to know: Flexible hold, natural finish, volume, movement, and separation.

Best pairings: French crops, textured tops, medium scissor cuts, loose waves.

Client-friendly explanation: Keeps the style movable and natural while adding separation.

Clay Pomade

What to know: Strong hold, matte finish, and added volume; especially useful on shorter, defined styles.

Best pairings: Skin fades with textured tops, crops, short pompadours, thick short hair.

Client-friendly explanation: Strong hold with almost no shine.

40 Proof Sea Salt Spray

What to know: Light-to-medium hold and textured finish; apply from the roots on damp or towel-dried hair.

Best pairings: Beach cuts, textured scissor cuts, waves, pompadours, pre-styling.

Client-friendly explanation: Creates lift and texture before the final styling step.

30 Proof Styling Cream

What to know: Light hold, natural sheen, and weightless control; can work as a pre-styler, daily styler, or light beard tamer.

Best pairings: Scissor cuts, softer tapers, medium-length hair, light beard control.

Client-friendly explanation: Keeps the hair controlled but soft and natural rather than stiff.

Advanced Volumizing Foam

What to know: Flexible hold and added fullness without aiming for heavy residue or crunch.

Best pairings: Fine hair, textured pompadours, medium-length cuts, blow-dried styles.

Client-friendly explanation: Helps the hair look fuller before the finishing product.

Hair Pomade

What to know: Firm hold, volume, shape, separation, flyaway control, and dry-end smoothing; usable on wet or dry hair.

Best pairings: Classic shapes, curls, side parts, slick styles, next-day refreshes.

Client-friendly explanation: Gives control and definition while helping smooth the ends.

Equilibrium Shampoo

What to know: Gentle balancing cleanser. Massage into wet hair with attention to the scalp, rinse, then follow with conditioner.

Best pairings: General home-care recommendation before styled haircuts.

Client-friendly explanation: The cleansing step before conditioner restores manageability.

Everyday Conditioner

What to know: Lightweight hydration and manageability; concentrate on mid-lengths and ends and rinse after two to three minutes.

Best pairings: Medium and long scissor cuts, dry-feeling hair, regular wash routines.

Client-friendly explanation: Helps keep the hair manageable so the haircut styles more easily at home.

Beard Balm

What to know: Cosmetic softening, shaping, and hydration for the beard and skin beneath it.

Best pairings: Classic, tapered, mid-length, and scissor-finished beards.

Client-friendly explanation: Helps soften the beard and keep the finished shape controlled.

Final review with Charlie

Which haircut family is currently strongest?

Which haircut family needs the most repetition?

Which products can I now recommend confidently?

Where am I still losing service time?

What has improved most in my consultation and retention habits?

Which 15 looks belong in the final portfolio?

What should I focus on in the next 30 days?

Instructor final notes:
